

**CITY OF CAMILLA
PUBLIC SERVICE ANNOUNCEMENT
NOTICE OF NATURAL GAS SAFETY SURVEY**

Twice a year City of Camilla utility customers receive natural gas safety brochures in their utility bills providing important information on natural gas pipeline safety and precautions to take in the event of a natural gas emergency.

The City of Camilla is currently conducting a natural gas safety survey to evaluate the effectiveness of messages received as part of the Public Awareness Program. Selected customers will be receiving a computerized phone call and a series of questions will be asked. The survey is quick and easy to complete and educational information on natural gas safety will be provided. Customers receiving the call are asked to please participate in the survey. Natural gas is an important commodity in our community and greater public awareness around natural gas safety is a top priority. The City is committed to providing safe, reliable natural gas service to our customers and ensuring the safety of those who live or work near our natural gas pipelines. The survey is expected to take three weeks to complete and we thank you in advance for your participation.
